

## WHAT ARE FACT SERVICES?

FACT is an intensive, community-based program that combines behavioral health services with forensic and legal system coordination. FACT supports individuals who have both significant mental health needs and involvement with the justice system, helping them stabilize, meet legal obligations, and successfully live in the community.

## SERVICE HIGHLIGHTS

- Small caseloads allow for focused, individualized support
- 24/7 on-call availability ensures help is available during crises
- Services are delivered in real-life settings in the person's home or community
- Care is coordinated by a team of clinical providers, peer support, nursing, and forensic specialists

## OUR APPROACH

FACT is rooted in the belief that recovery is possible. By addressing behavioral health needs alongside legal obligations, the program helps people reduce barriers, build stability, and move forward successfully.

## COMMUNITY IMPACT

FACT promotes safer communities by reducing strain on emergency systems, supporting accountability, and improving long-term outcomes for people and the community.
